

COVID-19 Cumulative Hospitalizations

May 19, 2020

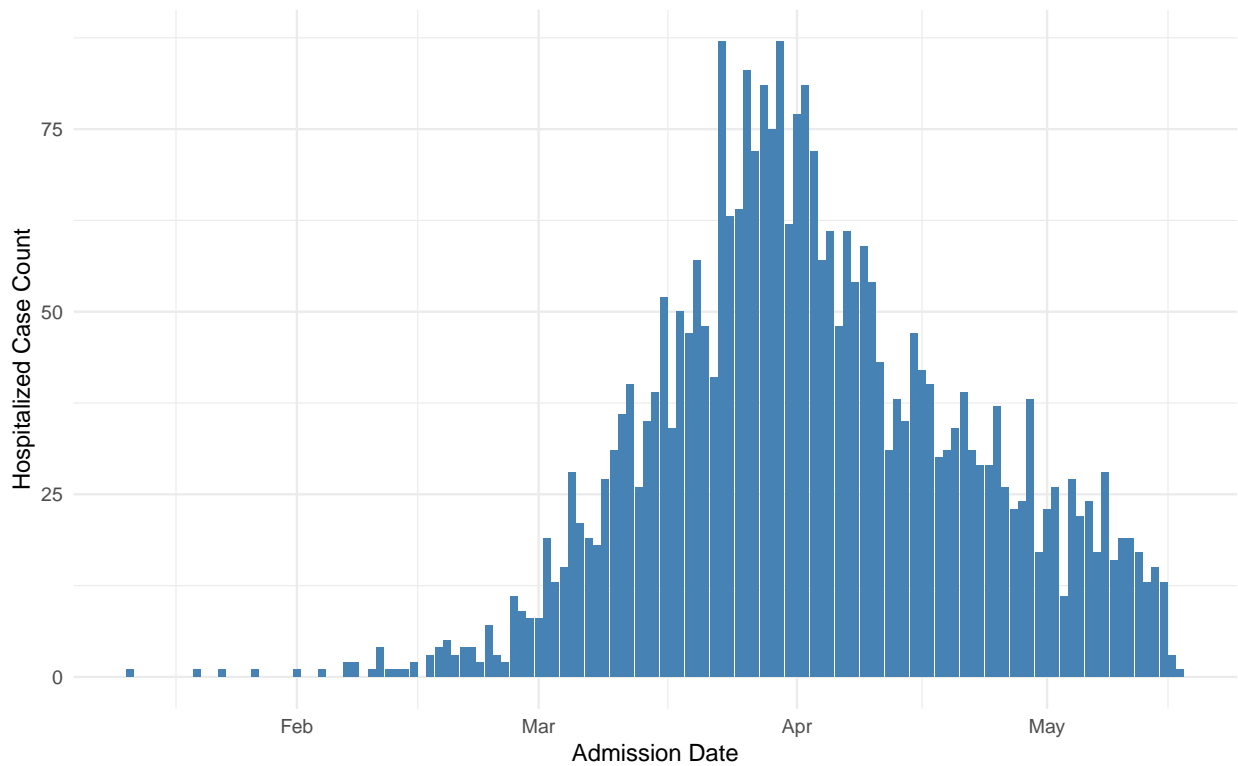

The following report contains data on hospitalizations identified among lab-confirmed cases of COVID-19 among Washington residents reported through 11:59pm on 2020-05-18.

Note: To date, 100% of acute care hospitals have reported retrospective hospitalizations that occurred since January. Hospitalizations are being identified prospectively at 100% of acute care hospitals.

Table 1. COVID-19 Cases Hospitalized

Hospitalized	Count	Percent of Cases
No	12234	79.7%
Yes	3113	20.3%
Unknown	3464	18.4%

Figure 1. Epidemiological Curve of Hospitalized COVID-19 Cases by Date of First Admission*

* 68 records indicate the case was hospitalized but admission date is missing. These events are excluded from the chart.

Figure 2. Epidemiological Curve of Hospitalized COVID-19 Cases by Illness Onset

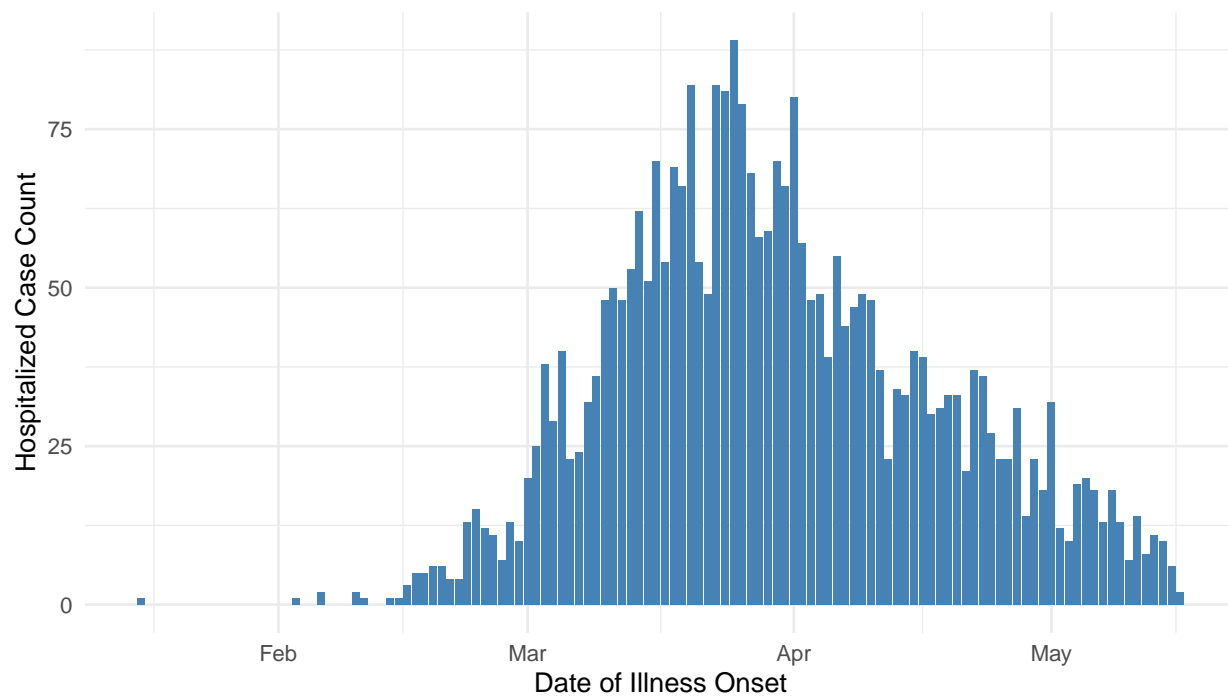

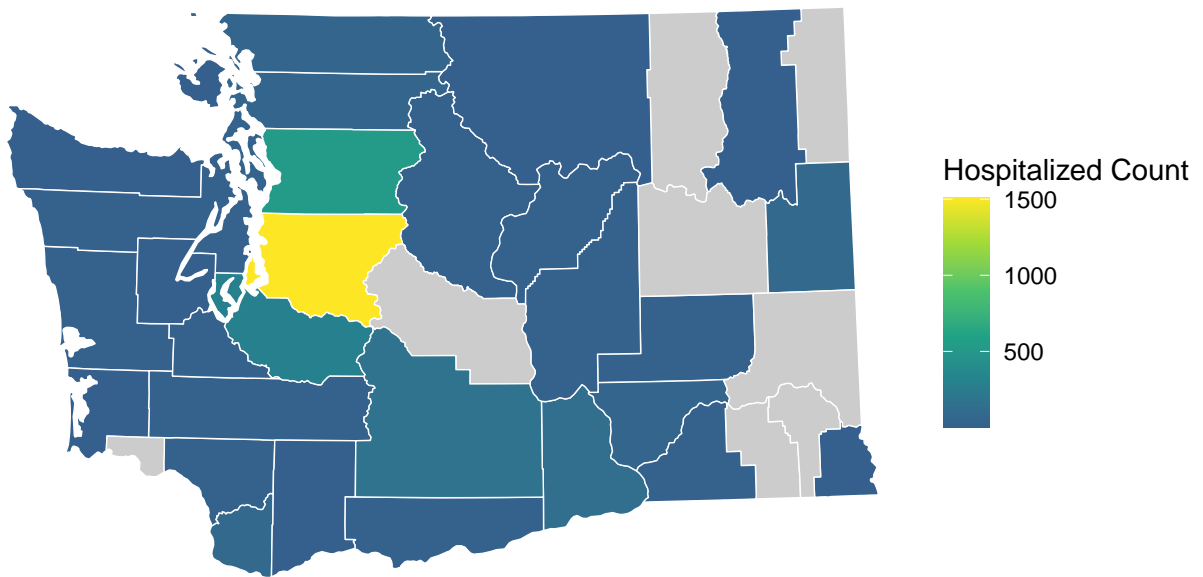

Figure 3. Hospitalizations by County of Residence

*Counties that are greyed out have had 0 COVID-19 hospitalizations identified to date.

Figure 4. Hospitalizations by Age

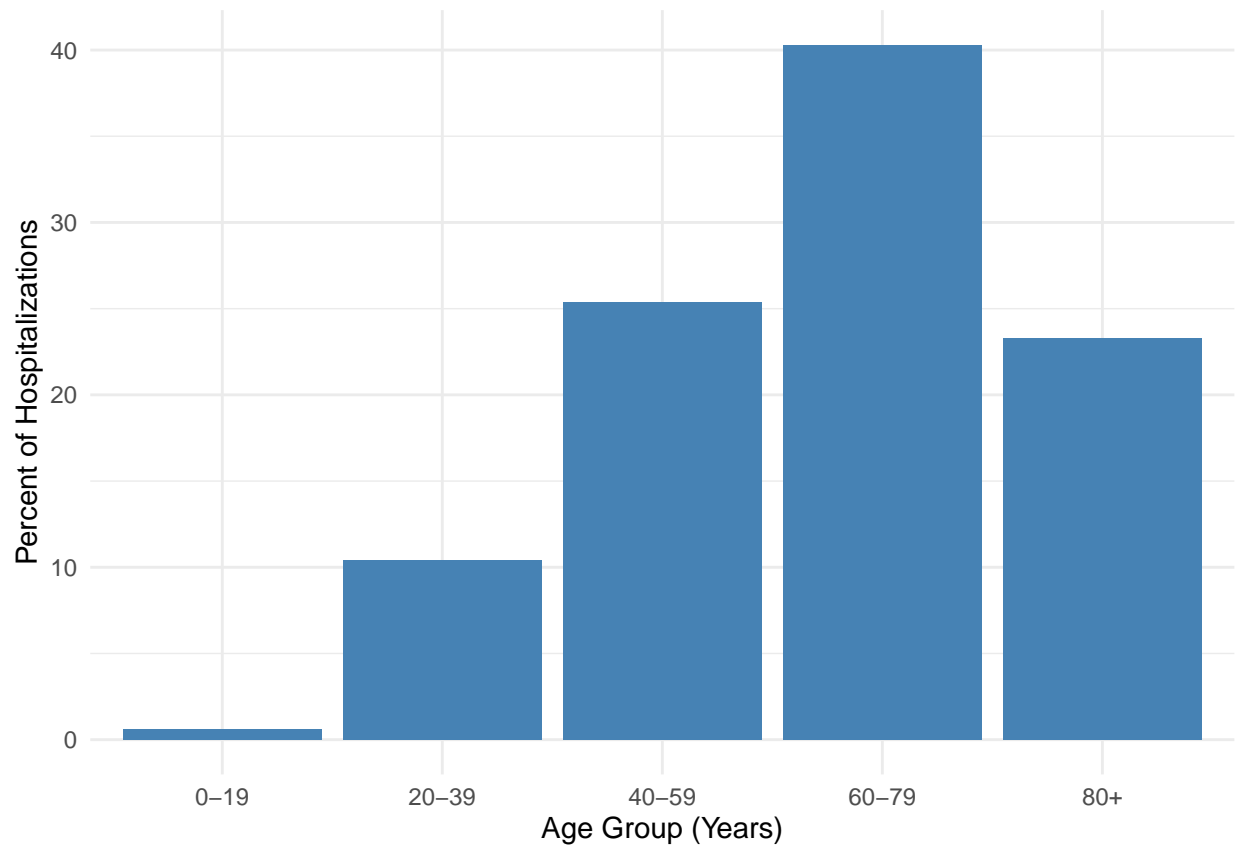

Table 2. Hospitalizations by Age

Age Group (years)	Percent of Hospitalizations
0-19	0.6%
20-39	10.4%
40-59	25.4%
60-79	40.3%
80+	23.3%
Unknown	0.1%

Figure 5. Hospitalizations by Sex

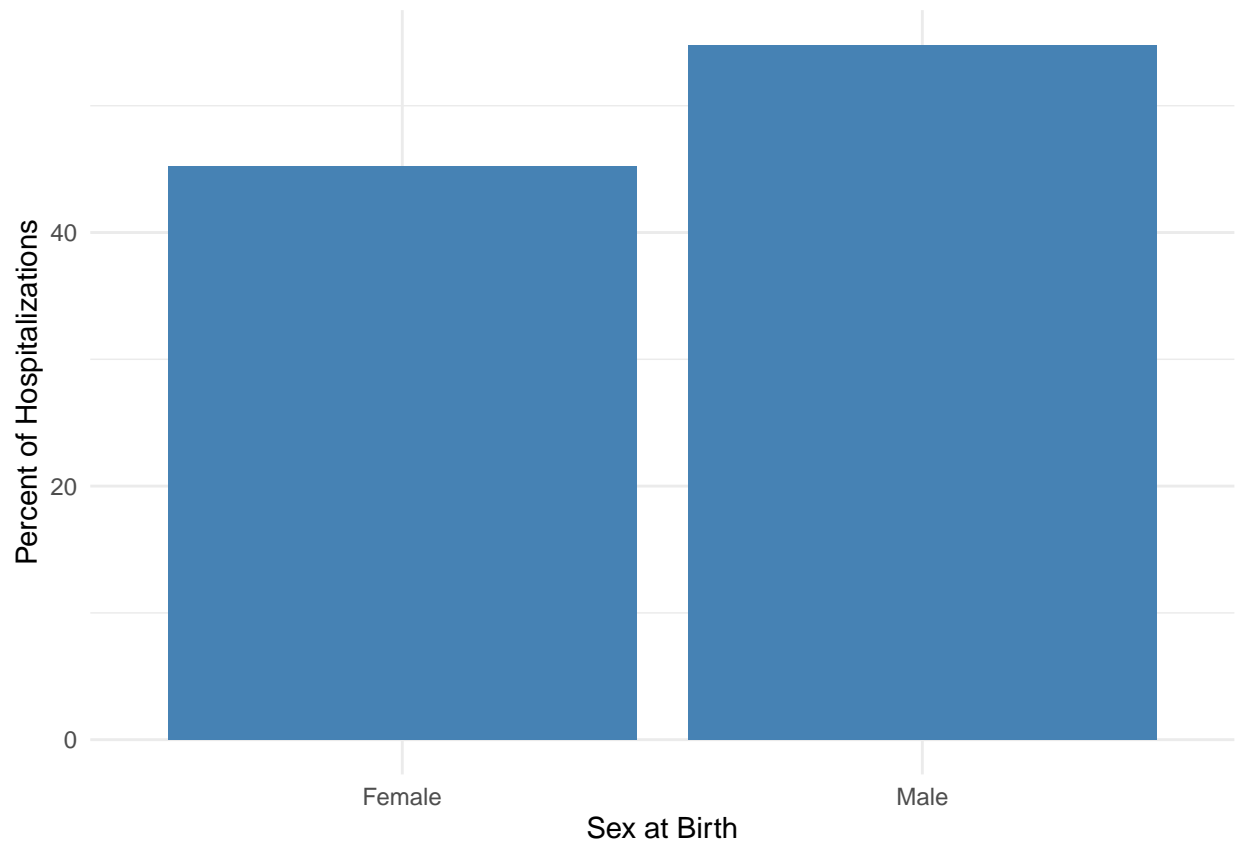

Table 3. Hospitalizations by Sex

Sex at Birth	Percent of Hospitalizations
Female	45.2%
Male	54.8%
Unknown	1.2%

Figure 6. Hospitalizations by Race/Ethnicity

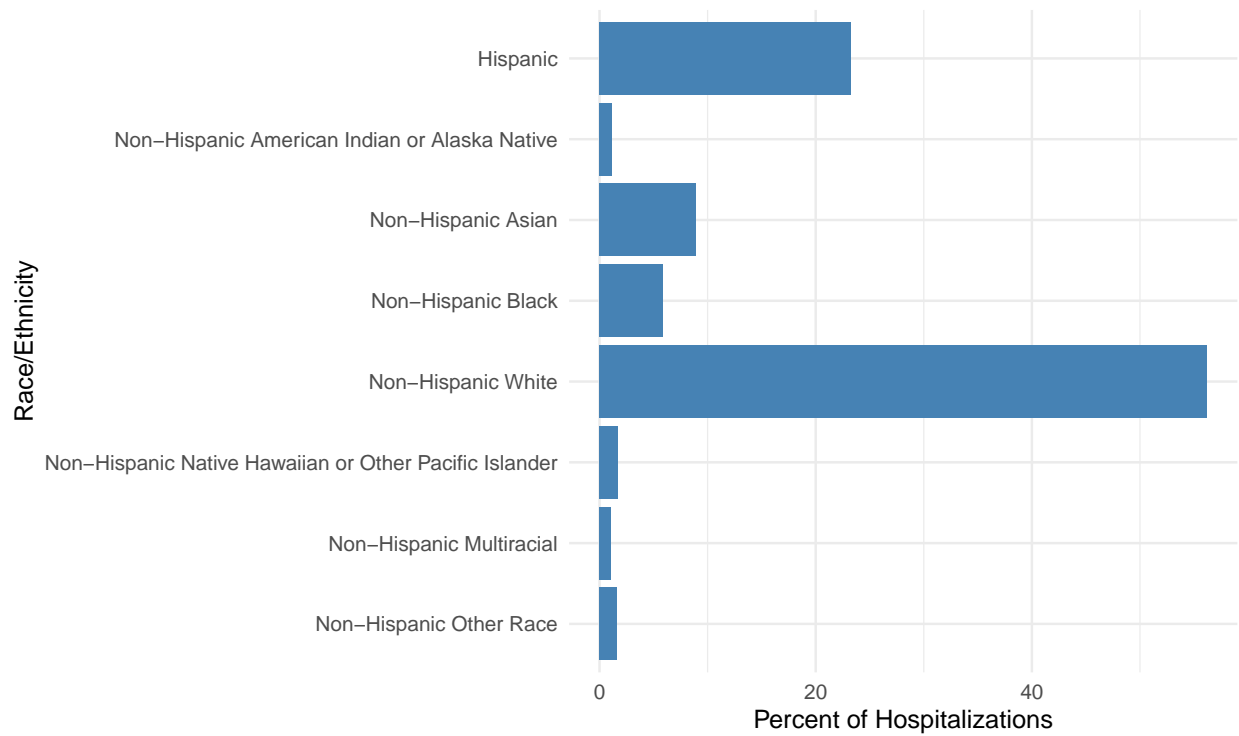

Table 4. Hospitalizations by Race/Ethnicity

Race/Ethnicity	Percent of Hospitalizations
Hispanic	23.3%
Non-Hispanic American Indian or Alaska Native	1.2%
Non-Hispanic Asian	8.9%
Non-Hispanic Black	5.9%
Non-Hispanic White	56.2%
Non-Hispanic Native Hawaiian or Other Pacific Islander	1.7%
Non-Hispanic Multiracial	1.1%
Non-Hispanic Other Race	1.6%
Unknown	27.6%
